Tutorial template

Robin Doe

2025-09-01

This is intended to be a tutoral template for the Linguistics Methods Hub. You can fork and rename this repository, then proceed to delete and rename files as works best for your needs

Template repository url: https://github.com/LingMethodsHub/template

Authoring

Writing `.md`, `.rmd` files

All markdown, rmarkdown and quarto files will be rendered (except for any named `README*`), and can be written in your preferred way.

rmd output

Writing `.qmd` files

You can write quarto documents exactly like rmarkdown files.

qmd output

Jupyter

You can also write tutorials in a jupyter notebook, and they will be rendered into the same output.

jupyter output

Header information

Author information

The author yaml information for this page is

```
author:
  - name: "Robin Doe"
    url: "http://www.example.com"
    affiliations:
      - University of State
```

The full author schema, from the quarto docs, is

```
author:
  - id: string
    number: number
    name:
      given: string
      family: string
      literal: string
      dropping-particle: string
      non-dropping-particle: string
    url: string
    email: string
    fax: string
    orcid: string
    note: string
    acknowledgements: string
    attributes:
      corresponding: boolean
      equal-contributor: boolean
      deceased: boolean
    metadata: object
    affiliations:
```

Format

If you include both information for both `html` and `pdf` output formats, they will both be generated, allowing a standalone pdf for printing etc: pdf output.
